

Environmental Policy

As an established and highly regarded provider of managed building services Carmel has become a leader in our field. We are committed to providing our clients with a high quality service, whilst respecting the environment and effectively managing any impacts that may arise from activities under our direct control.

We will deliver effective environmental management and leadership by:

- Ensuring that all our activities comply with all legislation and other requirements applicable to the organisation. Where no applicable legislation exists we will adopt best practices;
- Setting and reviewing environmental objectives and targets as part of our environmental management system to ensure we continually improve;
- Monitoring and reviewing our operations to minimise the potential for environmental impacts, continually improve, and to prevent pollution;
- Providing adequate resources to manage our activities and the environmental impacts that may arise;
- Selecting our partners with consideration of their environmental performance;
- Ensuring our staff have the training they need to manage impacts from their work activities on the environment;
- Communicating this policy to all our staff and those who work on our behalf.

We will review this policy on an annual basis.

A handwritten signature in black ink, appearing to read 'C Clarke'.
